TO: Clients Considering Mark Kamin for
Consulting Possibilities

I would like to acknowledge the benefits of Mark Kamin's consulting work with me relative to preparing key management personnel on the Ford Aerospace team for oral presentations to NASA. The overall presentations are a key part in demonstrating Ford's ability to manage the Space Transportation Systems Operations Contract (Space Shuttle Program).

Mark's insight into human possibilities and commitment to getting the results required to create a "winning edge" have been very useful to me on the project. His contribution to producing results is always consistent, and demonstrates itself in a committed way.

I would welcome the opportunity to discuss his work with you personally. I can be reached on 313-446-7605.

Sincerely yours,

A. P. Mueller
