

"I have used Mark Kamin as a coach for over 25 years. I am the CEO of a bio-tech manufacturing firm that sells state of the art chromatography equipment, buffering systems, bio reactors, continuous flow manufacturing systems, and other systems to a wide range of customers (www.sepragen.com). We effectively compete with large firms many times our size because our equipment is recognized as second to none. The demand for our team to perform at a very high level of excellence has been greatly enhanced by the coaching and sessions with Mark Kamin and Associates. Excellence is our competitive advantage. The distinctions at the heart of Mark Kamin and Associates work with my team has raised our level of integrity, accountability, and commitment to an extraordinarily high level, so that excellence is normal for us."

A handwritten signature in black ink, appearing to read 'Vinit Saxena', with a long horizontal flourish extending to the right.
